Inspire people - strengthen regions

MUNICIPALITIES & REGIONS

Inspire people - strengthen regions

Quality of life and both economic and environmental sustainability are the main topics of our work. We assist people in developing their abilities and talents and in broadening their knowledge where they live. Doing voluntary work ourselves, we have great respect for what many people achieve in their spare time for the quality of life in their municipalities.

Together with these committed people

and the decision-makers in the municipalities and regions we develop perspectives for a future worth living. We then assist them with creative methods in developing and carrying out projects and activities.

Responsibility for quality of life does, however, not end at the boundaries of one's own municipality, but also has a global dimension. Therefore, we aim to show how each and every one of us can

contribute to global changes by acting locally. Since 1995, 200 municipalities in Austria, Germany and Switzerland have put models from the SPES Zukunftsakademie into practice. Among our clients we count municipalities and associations for regional development as well as provincial governments, ministries, interest groups and scientific institutions. We implement EU-funded projects in close cooperation with partner regions throughout Europe

TOPICS & SERVICES

Agenda 21: “Shaping the future!” We provide your municipality with professional assistance in its efforts to implement future-oriented strategies involving a large part of the population.

Local supply and regional development: “Ensuring local supply has a future!” Together with you and with the help of our tried and tested models we can work out various creative solutions. Then focus efforts and motivate people to act accordingly & responsibly.

Talks and moderations: Are you planning an event or closed-door meeting? We offer professional lectures and assist you with organization and moderating. With us, your project will be a success!

Global solidarity: “Think global – act local!” Realizing, forming and using the link between global development and local spheres of influence. We will assist you on your way into the future.

Sustainability research and model development: Based on scientific findings and latest research, we develop practical models for a sustainable development of municipalities and regions.

Learning regions & knowledge management: “Inquisitive regions are happy regions!” We teach you how to find and treasure regional knowledge and how to use it strategically towards developing positive future trends.
